Heat design

The following pictures show some measurements of mounted 5W Led on the heat sink for each board A and B (See Fig 1) with using thermograph to make an observation about heat distribution. Each boards is tested at various current conditions.

As a result, LED needs larger heat sink as much as possible to reduce its own case temperature.

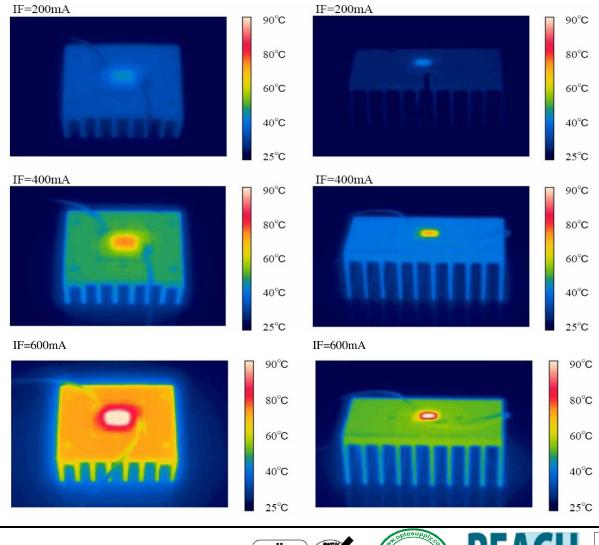

| LED power | Material | Surface area (mm²) Min. |
|-----------|---|--|
| 5W | Al | 10,300 |
| 10W | Al | 20,600 |
